SUMMARY

Data Analyst with expertise in Python, SQL, R, and data visualization (Power BI, Tableau). Skilled in data cleaning, EDA, and dashboard development to generate actionable business insights.

TECHNICAL SKILLS

- Programming: Python, SQL, R.
- Data Analysis: Pandas, NumPy, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA).
- Visualization: Power BI, Tableau, Plotly, Streamlit, Dashboard Development.
- Databases: MySQL, SQLite.
- Tools and Technologies: Microsoft Excel (Pivot Tables, VLOOKUP), Jupyter Notebook, Visual Studio, Git, GitHub.
- Data Engineering & IoT: MQTT Protocol, Real-Time Data Processing, Data Pipeline Development.
- Machine Learning: Regression, Classification, Random Forest, MLP, Model Evaluation, Feature Engineering, Hyperparameter Tuning.
- Soft Skills: Analytical Thinking, Problem Solving, Communication Skills, Attention to Detail

EXPERIENCE

- **Siddharaj Innovations Pvt. Ltd.** Pune
(Data Analyst Intern) Oct 2025 - May 2026
 - Analyzed 20,000+ real-time IoT sensor records to identify trends, anomalies, and performance insights.
 - Performed data cleaning and Preprocessing using Pandas and NumPy to enhance data quality and usability.
 - Implemented automated data pipeline using MQTT and Python for real-time data ingestion and processing.
 - Optimized data pipelines to improve processing efficiency and reduce real-time ingestion latency.
 - Developed interactive dashboards using Streamlit to monitor KPIs and visualize system performance.
 - Analyzed sensor behavior patterns to support predictive maintenance and reduce downtime.

PROJECTS

- **Phishing Email Detection Web App (GitHub)** Aug 2024 - Mar 2025
(Python, Machine Learning, Flask)
 - Preprocessed phishing and legitimate email datasets using Python and TF-IDF for feature extraction and machine learning.
 - Performed exploratory text analysis to identify phishing patterns and improve feature selection.
 - Developed a Scikit-learn classification model achieving 92% accuracy through feature engineering and model optimization.
 - Built a Flask web application for real-time phishing email detection and prediction.
 - Integrated SQLite database for secure user authentication and email record management.
- **Interactive Analytics for Business Growth (GitHub)** Dec 2023 - Mar 2024
(Python, Pandas, NumPy, Plotly, Streamlit)
 - Cleaned and transformed 10,000+ sales records using Pandas and NumPy for accurate business analysis.
 - Performed exploratory data analysis (EDA) to identify sales, customer, and profitability trends.
 - Analyzed regional and product performance to uncover business growth opportunities.
 - Developed an interactive Streamlit dashboard with Plotly to visualize KPIs and sales insights.
 - Generated actionable insights to support data-driven business decisions.
- **Global Tech Salary Dashboard (GitHub)**
(Tableau, SQL)
 - Analyzed global technology salary data using SQL, including JOINS, GROUP BY, and window functions.
 - Cleaned and prepared salary datasets in MySQL for accurate reporting and analysis.
 - Developed an interactive Tableau dashboard to visualize salary trends across countries and experience levels.
 - Created KPI reports to compare salaries by role, company size, and location.
 - Identified compensation trends to support market and career analysis.

EDUCATION

- **Dr. D. Y. Patil Pratishthan's College of Engineering** Kolhapur
B.Tech in Computer Science Engineering (Data Science); CGPA: 8.04 Aug 2021 - June 2025
- **Laxmanrao Kirloskar Vidyamandir And Junior College** Palus
Higher Secondary Certificate (HSC); Percentage: 86.17 June 2020 - Feb 2021

CERTIFICATIONS

- Certified AI Foundations Associate Oracle
- Python for Data Scientist IBM
- SQL Certification HackerRank
- Power BI and Tableau Certification Simplilearn
- Applied Machine Learning Algorithms LinkedIn
